**APPLICATION TOOLS**

**Airless Spray:** N/A

**Conventional Spray:** N/A

**Brush:** N/A

**Roller:** N/A.

**Thinner:** N/A

**Mixing Instructions**

Add the proper amount of **BEHR Non-Skid Floor Finish Additive** to any latex or oil-based floor coating finish product container and stir thoroughly until dispersed uniformly. Stir occasionally during application. Apply coating to floor surface using a brush or roller. Refer to all paint and stain manufacturer's product labels for specific instructions on surface preparation and finish application. If applying more than one coat of floor finish, mix **Non-Skid Floor Finish Additive** into the final topcoat. Adding a non-skid additive will reduce the lifespan of the product; therefore, retain any leftover paint for periodic maintenance re-coating.

**This product, if added according to label directions, helps to prevent slipping by providing a slip-resistant coating. However, Behr does not warrant that this product will prevent accidents as described in the limited warranty below.**

This information is believed to be reliable; however Behr Process Corporation makes no warranty, guarantee, or representation and assumes no liability as to the absolute correctness or sufficiency of the specifications.
